KIDDE® CONTROL HEAD MONITOR
FOR ELECTRIC ACTUATORS

Reliable, Retrofitable, Peace-of-Mind Supervision for Clean Agent Systems

Meets All Codes and Standards
The Kidde Fire Systems’ Control Head Monitor (CHM) for electric actuators on discharge valve control heads meets the requirements of NFPA 2001-2012, UL 2166, UL 2127 and FM5600.

Simple Installation
The CHM is simple to install in new systems AND has the added benefit of easily retrofitting existing systems at a very reasonable price point. There is no need to switch out the existing electric actuator on discharge control heads.

Universal Compatibility
The CHM is also universal in use. It fits on all clean agent storage cylinder valves (1.5, 2.0 and 3.0 inch) the Advanced Delivery System (ADS) Nitrogen Drivers and the Nitrogen Pilot Cylinders for both HFC-227ea and Novec platforms. It is compatible with the following electric actuators:

- Electric Control Head w/ Cable Operator
- Stackable Explosion-Proof Control Head
- Electric Control Head
- Electric Explosion-Proof Control Head

Total Supervision
Our CHM is truly a supervised solution. It comes standard with 4 wires to ensure that you are not only supervising the placement of the electric actuator, but also that you are supervising the complete circuit from panel to CHM to junction box for continuity (in accordance with UL 864 Standard for Control Units and Accessories for Fire Alarm Systems 9th Edition.)

Extremely Robust
Our CHM meets the tough criteria Kidde Fire Systems demands of all its products. Besides UL Listing and FM Approval, it comes standard as an explosion-proof device that satisfies the following regulations:

When you choose Kidde, you’ve chosen the world’s most respected name in special hazards fire protection.
We are Kidde Fire Systems.
Kidde Fire Systems' products save people and property from the dangers of fire. Our broad product offering and design expertise have been protecting assets worldwide since 1917. We’re the smart choice when early fire detection and suppression needs are especially demanding. To advance our leadership in the industry, our family of special hazard fire protection brands has united. Kidde Fire Systems now incorporates Chemetron Fire Systems and Fenwal Protection Systems. As Kidde Fire Systems, we will enhance our customer focus and partnerships, provide highly efficient service and training, preserve a deep combined expertise in an array of vertical markets, and accelerate our product and technology developments, to the advantage of everyone who benefits from a world made safer from fire.

One united company. Advancing fire protection.
